Statement on Supreme Court DACA Decision

Today, the Supreme Court declared its official verdict that the Trump Administration’s termination of the Deferred Action for Childhood Arrivals (DACA) policy violated laws of rule and procedure. Together with our communities, we are deeply relieved by this judgment. DACA recipients are invaluable members of our society- in our communities, in our schools, in our workforce, and in our impassioned movements for immigrant rights and racial justice. We salute the long term organizing and advocacy that led to DACA and the strategic advocacy to broaden its reach to include all immigrants. The outcome of the Supreme Court ruling is a good step towards protections for irreplaceable members of our families, communities, and country.

Just Futures Law stands in solidarity with DACA recipients and their families in celebration of this ruling. We urge the administration to continue to preserve DACA as this pandemic continues to unfold and in the years beyond. As a movement, we must continue to fight side-by-side with Black, Brown, and immigrant communities, for the right to survive and thrive in our nation.
